New Revenue Recognition Standard Under IFRS 15

In May 2014, the IASB issued IFRS 15, *Revenue from Contracts with Customers*, which supersedes current revenue recognition requirements. The financial information under the heading "Financial Outlook" above is prepared in accordance with IFRS 15.

The standard will be effective for Talend for financial periods beginning on January 1, 2018, and provides alternative approaches to adoption. Under the new standard, and only for our on-premise and self-hosted offering, a portion of the subscription revenue arrangement will be recognized upfront for the value associated with the software license element of the arrangement, which Talend believes will be minimal in comparison to the entire arrangement, approximately 10%. The standard will also require that we defer all incremental commission costs to obtain customer contracts, such as sales commissions. Talend will be required to capitalize and amortize sales commissions for initial contracts over a period of benefit that we have determined is approximately five years.

Non-IFRS Financial Measures

In addition to disclosing financial measures prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standard Board ("IASB"), this press release and the accompanying tables contain certain non-IFRS financial measures.

Non-IFRS financial measures do not have any standardized meaning and are therefore unlikely to be comparable to similarly titled measures presented by other companies. Talend considers these non-IFRS financial measures to be important because they provide useful indicators of its performance and liquidity measures. These are key measures used by our management and board of directors to understand and evaluate our core operating performance and trends, to prepare and approve our annual budget and to develop short and long-term operational plans. In addition, investors often use similar measures to evaluate the performance of a company. Non-IFRS financial measures are presented for supplemental informational purposes only for understanding the company's operating performance. The non-IFRS financial measures should not be considered a substitute for financial information presented in accordance with IFRS, and may be different from non-IFRS financial measures presented by other companies. Please see the reconciliation of non-IFRS financial measures to the most directly comparable IFRS measure included in this release below.

Non-IFRS operating margin, expressed as a percentage, is calculated as non-IFRS loss from operations divided by total revenue.

Non-IFRS net loss is calculated by adjusting net loss to eliminate the impact of stock-based compensation expense, amortization of acquired intangibles expense, acquisition related expense and costs related to follow-on offering and shelf registration statement.

Non-IFRS cost of revenue is calculated by adjusting cost of revenue to eliminate the impact of stock-based compensation expense and amortization of acquired intangibles.

Subscription revenue growth on a constant currency basis represents subscription revenue adjusted to exclude foreign currency impacts. Subscription revenue on a constant currency basis is calculated by applying the average monthly currency rates for each month in the comparative period to the corresponding month in the current period. We believe the disclosure of subscription revenue in constant currency provides useful supplementary information to investors considering potential significant fluctuations in currency rates.
