

Talend Recognized in CRN's Big Data 100 List for Third Consecutive Year

May 22, 2018

Data Integration Leader Ranked Among Top 45 Coolest Data Management and Integration Vendors by CRN; Also Listed in Solution Review's "7 Data Integration Tools We Recommend"

REDWOOD CITY, Calif., May 22, 2018 (GLOBE NEWSWIRE) -- [Talend \(NASDAQ: TLND\)](#), a leader in [cloud](#) data integration solutions, has been named to the 2018 [CRN@ Big Data 100 list](#), a brand of [The Channel Company](#). This annual list recognizes vendors that have demonstrated an ability to innovate in bringing to market products and services that help businesses work with one of the most dynamic, fastest growing segments of the IT industry – Big Data. As a result of Talend's inclusion in the CRN Big Data 100, Solutions Review selected Talend Open Studio for Data Integration and Talend Cloud among its list of "[7 Data Integration Tools We Recommend](#)".

The data explosion in recent years has fueled a vibrant big data technology industry. Businesses need innovative products and services to capture, integrate, manage and analyze the massive volumes of data they are grappling with every day. Talend is committed to providing solutions that deliver the flexibility and reliability businesses count on to keep up with the rapidly evolving market demands.

"We're thrilled to once again be a part of CRN's Big Data 100 list, and honored to be included in Solutions Review's list of highly recommended data integration tools. These recognitions reinforce our mission to deliver the data agility required for companies to meet the constantly evolving demands of modern business," said Ashley Stirrup, CMO, Talend. "Talend provides innovative cloud, big data, and governance solutions that help dramatically improve customers' ability to deliver data-driven results."

[Talend Data Fabric](#) is an open source-based, data integration platform that combines all Talend products into a common set of powerful, easy-to-use tools for real-time or batch, data or application integration. Talend's suite of integrated, cloud-based, self-service apps is optimized for worker productivity and digital transformation. Using Talend, business and IT can collaborate on data integration and governance tasks, easily share work between apps, orchestrate stewardship tasks, increase confidence in their data and put more data to work, faster.

"The IT community is now able to collect massive volumes of valuable data – a veritable treasure trove of information for growing businesses," said Bob Skelley, CEO of The Channel Company. "But reaping the benefits of these huge information streams is a complex and delicate process requiring expertise in data capture, storage, organization, tiering, security and analysis. The vendors on CRN's 2018 Big Data 100 list have demonstrated an exceptional ability to help solution providers and their customers tackle this enormous project. The innovative products and services they have brought to market enable companies to not only manage large amounts of data, but to extract real value from it."

The CRN editorial team broke the Big Data 100 into four categories: data management, business analytics, big data platforms and [data protection and security analytics](#). Talend was listed among the [45 data management and integration technology companies](#) offering advanced data integration and preparation tools – a critical piece of the big data technology universe.

Solutions Review tracks the solution providers that have the biggest impact on the enterprise and chose the 7 data integration tools they determine to "matter most" from CRN's complete rankings.
