

Talend Recognized as a Leader in Big Data by DBTA Top 100, SD Times 100

June 27, 2018

Company earns spots on two top industry lists for its big data capabilities

Redwood City, June 27, 2018 (GLOBE NEWSWIRE) -- [Talend \(NASDAQ: TLND\)](#), a global leader in [cloud](#) integration solutions, has been named to the [Database Trends & Applications \(DBTA\) 100](#) and the [Software Development \(SD\) Times 100](#) lists for its ability to liberate data from legacy infrastructure to accelerate time to insights and business value.

The DBTA 100 list, which highlights companies that matter most in data, recognized Talend for its ability to “empower customers to derive business value quicker than ever before.” The SD Times 100 list recognizes companies, non-commercial organizations, open source projects and other initiatives for their innovation and leadership. This year’s list named Talend as a winner in the Big Data & Analytics category.

“Our mission at Talend is to help organizations make data valuable, trusted, and available more quickly to drive business value, and we are honored to be recognized in both the DBTA and SD Times lists this year for just that,” said Ashley Stirrup, CMO, Talend. “These recognitions validate our approach to delivering innovative big data and cloud integration solutions that improve our customers’ ability to deliver data-driven results.”

Talend delivers a single platform for data integration across public, private, and hybrid cloud, as well as on-premise environments, and enables greater collaboration between IT and business teams. Combined with an architecture for rapidly embracing market innovations, Talend allows organizations to cost-effectively meet the demands of ever-increasing data volumes and users.

Each year DBTA editors look to highlight a variety of companies addressing the evolving demands for hardware, software, and services. Similarly, the editors of SD Times look to identify the industry’s top leaders, innovators and influencers in 10 separate industry segments by considering each company’s offerings and reputation.
