

Talend Receives Recognition from G2 and Leading Technology Journal

May 19, 2020

Praised by Users for Product Excellence

REDWOOD CITY, Calif., May 19, 2020 /PRNewswire/ -- [Talend](#) (NASDAQ: TLND), a global leader in data integration and data integrity, announced today it has been recognized by a leading technology publication and peer review site for its product excellence. Both Database Trends and Applications (DBTA) readers and G2 users identified Talend as a top choice.

Talend was selected as a finalist in DBTA's Readers' Choice Awards Program in which information management solutions, products, and services are chosen by the people who actually use them. The publication's readers nominated Talend in two categories: Best Data Integration Solution and Best Data Governance Solution.

Talend was also named to several of G2's software lists, including a top software product for enterprise, for midmarket, and for highest satisfaction, based on data from over one million authentic and verified customer reviews. Written and published between January 1, 2019 to March 3, 2020, each review was vetted by a real person to ensure legitimacy.

"This isn't a subjective list based on a few peoples' opinions," explains G2 CEO, Godard Abel. "With the highest traffic and engagement, the largest selection of product and services, and highest quality data, G2 analyzes more than 4 million data points to determine which products and companies make the list."

Talend Data Fabric is the only data integration and integrity platform that simplifies all aspects of working with data for analysis and use, driving critical business outcomes. Talend Data Fabric includes a suite of apps to ensure enterprise data is complete, clean, compliant, and readily available to everyone who needs it throughout the organization.

"We're thrilled to have our product offerings recognized by people who are on the front lines of addressing data challenges," said Julien Sauvage, vice president product marketing at Talend. "By providing access to complete and clean data, our customers have an accurate view of their business, can make faster decisions, and mitigate their risk."

In addition to G2 and DBTA, Talend was also named to CRN's [Top 100 Big Data 2020](#), adding to the list of company accolades this year.

About Talend

Talend (NASDAQ: TLND), a leader in data integration and data integrity, enables every company to find clarity amidst the data chaos.

Talend is the only company to bring together in a single platform all the necessary capabilities that ensure enterprise data is complete, clean, compliant, and readily available to everyone who needs it throughout the organization.
