

Sumitomo Life Insurance Selects Talend to Build Company's Data Infrastructure

February 16, 2021

Leading life insurer uses Talend in data lake environment for data analytics

REDWOOD CITY, Calif. & TOKYO, Feb. 16, 2021 /PRNewswire/ -- [Talend](#) (NASDAQ: TLND), a global leader in [data integration and data integrity](#), announced today that [Sumitomo Life Insurance Company](#), one of the Japan's leading life insurance companies, has selected Talend Data Fabric for its data analytics infrastructure.

Sumitomo Life aims to become the most trusted and supported company by its stakeholders, including its customers, and to grow sustainably and stably. Sumitomo Life's vision is to offer advanced products to enable customers to live vigorously. To respond to that, the company is developing and delivering cutting-edge products that respond to its customers' current and expected futures needs in areas focusing on nursing care, medical insurance and retirement planning.

"With the trust from our customers as the starting point of all our activities, Sumitomo Life is providing optimal life insurance services to every person through the sound management of the insurance business," said Mr. Masakazu Ohta, General Manager in Charge of Information System Department at Sumitomo Life. "As a new approach, it was necessary to build a common foundation for big data management, and Talend is the driver. Talend's superiority in cloud implementation, development productivity, features, and licensing model convinced us to be part of this journey together."

To meet the needs of its customers and offer them innovative products and services, Sumitomo Life has decided to build a foundation for data analysis (*Sumisei Data Platform*) in the cloud for the promotion of new insurance products. The company evolved its legacy data environment to the new environment where they can store the data extracted from various systems both on-premises and effectively in the cloud.

In order to meet the needs of each individual customer and provide the best insurance for them, Sumitomo Life uses [Talend Data Fabric](#) as the hub of its data infrastructure. This manages data across the organization and integrates data into a data lake, which makes them able to utilize data across the company.

"We have been able to release projects with the continuous support of Talend, even amid the changing business environment in the Covid-19 crisis. We will continue to collaborate with Talend in order to actively promote company-wide data analysis projects," added Mr. Ohta.

"The insurance market is one of the most competitive sectors. By facing tight regulations and complex customer needs, companies must be at the forefront of innovation to offer even more services and new products to its customers," said Kenji Tsunoda, Country Manager Japan, at Talend. "Talend helped Sumitomo Life reinvent its data-driven infrastructure to provide a data management platform that enables the development of advanced products for its customers. We are delighted to support Sumitomo Life in the pursuit of their vision."
